## **PART ONE GENERAL INTRODUCTION**

### **1.1 BRIEF CONTEXT ANALYSIS AND RATIONALE**

#### **1.1.1 Tanzanian CSOs and COVID-19's Current Trends**

Worldwide, COVID-19 is harming individual and public health, health systems, and local to national and global economies, incomes, food supplies, and public programs for the poor and vulnerable. Spreading fast, the COVID-19 pandemic is exposing gaps, from the merely large to the overwhelming, in the disease preparedness and resilience of every society. This pandemic presents complex challenges—challenges requiring solutions from across our health, economic, social, environmental, and business sectors. The mix of so many diverse sectoral issues and actors that must contribute to an effective response to this pandemic necessitates the recognition of the role of Civil Society Organization's (CSOs).

Like many other nations around the world, Tanzania is currently struggling to control and prevent the spread of the COVID-19 outbreak and its effects. The COVID-19 was declared by the World Health Organization (WHO) to have reached a level of global pandemic on 11<sup>th</sup> March 2020 due to its alarming levels of spread and severity. According to the Tanzania's CSOs' position paper on COVID-19 (which also quoted numerous reliable sources of information), there are already more than 2,000,000 reported cases of COVID-19, including at least 200,000 deaths globally as of 22<sup>th</sup> April 2020. The figures keep on escalating every single day. Tanzania has 480 cumulative reported cases as of 28<sup>th</sup> April 2020<sup>1</sup> with a total of 190 recoveries and 16 deaths as a result of this outbreak.

As a response to COVID -19 outbreak, Tanzania has designed and currently is implementing a number of interventions guided by its *COVID-19 Contingency Plan March – August 2020*. There are also administrative committees established by the Prime Minister's Office (PMO) in March 2020. There are also legal and regulatory frameworks guiding this outbreak such as the *Disaster Management Act of 2015 (Act No. 7/ 2015)* and other sectoral laws including the *Public Health Act of 2009 (Act No.1/ 2009)*.<sup>2</sup>

Moreover, apart from those efforts, the Ministry of Health, Community Development, Gender, Elderly and Children (MoHCDGEC) has staged up the Risk Communication and Community Engagement (RCCE) team, which involves State and non-state actors (mostly from international non-governmental organizations (INGOs) and United Nation (UN) agencies).

---

<sup>1</sup> URT, Taarifa kwa Umma – Mwenendo wa Ugonjwa wa Corona (COVID-19) Nchini. Dar es Salaam, Jumatatu 13, 2020. Signed by Hon. Ummu Mwalimu (Mb), Minister of Health, Community Development, Gender, Elderly and Children, Tanzania.

<sup>2</sup> Note: The CSOs will continue engaging with the government to ensure that this or related legal frameworks are effectively utilized in coordination of the COVID-19's control and prevention efforts. One of the interests here is to consider presence of a room for an effective involvement and participation of CSOs in such efforts.

On the other hand, local CSOs have also tried their best to compliment government's efforts in particular on control and prevention of the spread of COVID-19. Most of what have been done by CSOs include: (a) raising public awareness through various means including online platforms; and, (b) closure of physical operations and working from home as part of social distancing requirement to reduce risks of spread of infections. However, only a few of local CSOs have managed to meaningfully contribute and be part of preventing efforts apparently due to budgetary constraints and inadequacy of basic facilities like laptops and internet connections to all staff which limit CSOs to hold accessible virtual and inclusive meetings.

### **1.1.2 Objectives of this Result Based Action Plan**

This Action Plan is an implementing tool of the Tanzania CSOs Directors' Position Paper.<sup>3</sup> The Plan translates into actions what CSOs would like to see included within the COVID-19 control strategies. It is also intended to supplement the government of Tanzania's control, prevention and other response initiatives. More than 200 CSOs from across the country as listed in the position paper effectively participated in the development of this Action Plan.

Taking into consideration the fact that different CSO have different goals and objectives, while effective control of COVID-19 demands solidarity, this plan is brought into being in order to systemize and standardize CSOs' engagements in COVID-19 outbreak between themselves as civil society actors and between CSOs and the government's initiatives at national and local government (LGAs) levels.

In addition, the Plan is intended to guide stakeholders on strategic directions to take which CSOs consider appropriate measures for added impetus to the government's efforts. The strategic direction proposed for actions in this plan include a consideration of COVID-19 beyond its current prevalent trends. Therefore, post COVID-19 exposures (effects) issues like stigma, discrimination, economic disempowerment, fear, anxiety, legal reforms of public health and disaster management laws etc., are all considered.

### **1.1.3 Rationale of this CSOs' Result Based Action Plan**

---

<sup>3</sup> The CSOs Directors' Forum (CDF) is a platform which offers a range of opportunities for Civil Society Organizations (CSOs) to, among others, (i) interact and learn from each other especially on the availability of opportunities which can be tapped; (ii) enhance the capacities of CSOs through peer learning; (iii) deliberate on, analyze and recommend on pertinent issues concerning the CSS and the national development at large; and, (iv) engage in advocacy interventions generally. Currently, the forum is comprised of more than 200 directors, representing a range of CSOs in Tanzania Mainland and Zanzibar. The CSOs forming this forum are all registered organizations with mandate on issues pertaining to gender rights, health, education, governance, environment, economy, policies, legal development, disability, children, women, elderly and human rights in general. Basing on this huge assortment, the CSOs Directors' forum authorized its secretariat/ coordination unit, the Tanzania Human Rights Defenders Coalition (THRDC) and ActionAid-Tanzania to lead the mobilization of efforts for this particular CSOs COVID-19 engagement. As of now, the CDF is the only main CSOs loose and inclusive forum in Tanzania that leads and coordinates common issues related to Civil Sector in Tanzania Mainland and Zanzibar.

Despite these efforts, which CSOs generally consider them timely and appropriate there are a few concerns that are considered pertinent. These include the following: -

- (i) RCCE and similar initiatives do not offer enough and effective inclusion and participation of local partners apart from some of the international and United Nations (UN) based stakeholders. The local CSOs are of the view that, their inclusion into RCCE and similar coordination mechanisms will add impetus especially because they have a clear and wide understanding of the local contexts down to the grassroots levels. An effective engagement of both local and international NGOs is also for sustainability of the processes and results.
- (ii) Given the fact that the majority of CSOs are scattered and uncoordinated, this coordinated initiative will provide a wide and inclusive ground for CSOs to complement government efforts. Moreover, since CSOs operate in various thematic areas, this joint action plan will enable them to come up with a generic strategic document covering all aspects of effective interventions which are relevant to CSOs.
- (iii) The current plans and other initiatives on the pandemic are mostly focused on treatment to manage the crisis' as it manifests at the moment. This too is commended due to the nature of the outbreak. However, there are concerns that:-
  - (a) The generalization of the interventions against COVID-19 would not cover all groups according to their specific needs. Vulnerable or special groups like needy women, children, persons with disabilities (PWDs), persons with underlying predisposing conditions, prisoners, remandees, asylum seekers, vulnerable migrants and the elderly.
  - (b) The 'management of the crisis' approach could not address other pertinent issues relating to the outbreak such as the stigma, discrimination, fear, anxiety and economic disempowerment. The current public interventions have not adequately addressed the aftermath or 'hit-back' of the pandemic. Key services such as psychosocial supports must clearly feature within the ongoing plans and interventions.

Therefore, as a way of addressing those intervention gaps; and, in a bid to systemize and standardize CSOs' engagement in collaboration with government initiatives in the control and prevention of COVID-19 outbreak, this Action Plan is hereby developed to serve the purpose. This Action Plan has to be read together with CSOs Position Paper from the following link <https://thrdc.or.tz/tanzania-csos-position-paper-and-strategic-intervention-areas-on-covid-19/>

## **1.2 UNDERLYING PRINCIPLES OF THIS PLAN**

Taking into consideration the fact that this initiative (Action Plan) will involve multi-stakeholders at implementation level; and, for purpose of reinforcing common traits among CSOs and therefore

to achieve common results through standardized and systemized interventions in Tanzania, the following shall be minimum guiding principles<sup>4</sup> for all CSOs to observe:-

- (i) **Strategic Linkage with the Government's Initiatives:** That is, apart from supplementing the missing areas as highlighted above, CSOs will always work within the protocols established and guided by the government of Tanzania.
- (ii) **Gender Sensitivity:** Ensuring that all interventions are gender sensitive – having specific consideration for women, children, youth, elderly, prisoners, refugees and other vulnerable groups.
- (iii) **Disability Sensitivity:** Ensuring that all interventions including communications are disability sensitive and are taking into consideration all barriers to accessibility (basing on all forms of disabilities) and that, all principles governing disability rights and responsibilities as provided for under Section 4 of the Persons with Disabilities Act of 2010 and provisions the UN Convention on the Rights of Persons with Disabilities of 2006 are effectively taken into consideration.
- (iv) **Communication:** Ensuring intended messages or information is balanced, objective and effectively communicated, well understood and the desired responses or interventions achieved.
- (v) **Transparency and Accountability:** Responding to stakeholders' concerns in an effective, satisfactory, timely and transparent manner; and, ensuring that, the stakeholders have clear understanding of their specific roles and desired expectations of this engagement.
- (vi) **Inclusive:** Encouraging and supporting broad stakeholders' inclusion and participation including small sized CSOs, gender, youth, key populations, people living with HIV, disability and other vulnerable groups in all opportunities that arises in the course of implementing this COVID-19 Action Plan.
- (vii) **Honest and Integrity:** Recognizing and reinforcing the rights, beliefs, values and interests of Tanzanians as stipulated in the laws, rules, regulations and policies governing public health and related matters.
- (viii) **Result-Oriented:** Ensuring that all interventions on COVID-19 which are implemented in accordance with the Action Plan results' framework are outcome-based and the results are identified, analyzed, consolidated, communicated and sustained.

### 1.3 ANALYSIS OF STRENGTHS, WEAKNESSES, OPPORTUNITIES AND CHALLENGES - SWOC

There would be some internal and external factors that would influence positively or adversely an implementation of this Action Plan and its results. The internal factors are considered as strengths and weaknesses of the CSOs; while, the external factors are opportunities and challenges (threats) – in respect of political, economic, social, technological or legal (PESTL). Below is a brief SWOC analysis.

**Table 1: SWOC Analysis – CSOs Engagement in COVID 19**

<sup>4</sup> Some being borrowed and modified from: CHRAGG, 'Stakeholders' Engagement Strategy.' August 2018.

Internally	Externally
<b>A: Strengths</b> <ul style="list-style-type: none"> <li>Registered and operates under the laws of Tanzania.</li> <li>Wide experience in health interventions in Tanzania</li> <li>Wider coverage to the grassroots levels e.g presence of extended-arms such as paralegals, community mobilizers and other CBOs.</li> <li>Presence of thematic and other types of networks with state and other non-state actors.</li> <li>Deeper understanding of different typographical contexts of Tanzania – as local CSOs.</li> <li>Having close ties with local government authorities down to the street, village levels and hamlet levels.</li> <li>Coverage in Mainland Tanzania and Zanzibar.</li> </ul>	<b>B: Opportunities</b> <ul style="list-style-type: none"> <li>Presence of already existing government structures on COVID-19 which could accommodate local CSOs.</li> <li>Presence of willingness for the government to engage with CSOs.</li> <li>Presence of national (Tanzanian) and international (WHO) plans and strategies on COVID-19 which could mainstream(?) CSOs Action Plan.</li> <li>Presence of a legal framework on civil society sector which supports engagement of non-state actors in health related issues.</li> <li>Presence of technological advancement such as internet coverage, smart phones, social media platforms, etc.</li> <li>Willingness of development partners to change grant directions.</li> </ul>
<b>C: Weaknesses</b> <ul style="list-style-type: none"> <li>Funding constraints and a possibility of this trend to continue.</li> <li>Absence of budgetary lines for pandemics</li> <li>Absence of pre-planned interventions on pandemics of this nature – fixed plans.</li> <li>Insufficient experience to handle pandemics of this nature.</li> <li>Presence of different opinions and approaches on COVID-19 pandemic.</li> <li>Poor coordination among CSOs and lack of strong solidarity.</li> </ul>	<b>D: Challenges/ Threats</b> <ul style="list-style-type: none"> <li>Presence of COVID-19 plans such as Risk Communication and Community Engagement (RCCE) team which do not offer sufficient room for engagement of all CSOs especially the local ones.</li> <li>Possibility of challenges of foreign funding due to severe COVID-19 outbreak in donor countries.</li> <li>Some anti-COVID 19 measures could limit CSOs direct interventions with the people e.g quarantine of the nature of lockdowns.</li> <li>Possibilities of failing to secure specific data on the actual prevalence rate of the pandemic e.g due to limited capacity including contact tracing.</li> </ul>

Despite significant challenges which local CSOs are facing in relation to COVID-19 outbreak as indicated in Table 1 above and in the CSOs' Position Paper on COVID-19, still there are possibilities and opportunities for this sector to support the government and other stakeholders' initiatives to control and prevent the pandemic in Tanzania. The CSOs anticipate that the coordination mechanisms by the government under the MoHCDGEC and PMO will be reformed to holistically accommodate a wider community of CSOs and other actors in line with this Action Plan.

The CSOs will continue banking on the strengths and effectively utilize available opportunities as per Table 1 above to address their internal weaknesses and challenges and the pandemic at the

same time. The subsequent part of this Plan document explains the strategic objectives, deliverable results, actions proposed and intervention strategies.

## **1.4 RISKS ASSESSMENT AND MITIGATIONS PLANS**

- (i) Lack of resources for implementation of this Plan due to the fact that donor countries are also affected by COVID-19.

### **Possible Mitigation Plans:**

- Continue negotiating with all funding partners for the flexibility to reallocate project activity funds in order to prioritize COVID-19 intervention measures as proposed in this Plan at hand.
- Mobilizing CSOs in Tanzania for a joint local resource mobilization initiative on COVID-19.

- (ii) Side impact of other potential measures against COVID-19 such as total lockdown, working from home and restriction of movements - might affects the implementation of this Plan.

### **Possible Mitigation Plan(s):**

- Working with a limited number of people, using online mechanisms such as social media, community radio and mainstream media to implement some of planned activities.
- Making use of available local structures including social networks in reaching out grassroots-based communities.
- Coming up with risk assessment and assurance plan ( Under KPGM support)

## **PART TWO**

### **STRATEGIC OBJECTIVES, RESULTS AND INTERVENTION STRATEGIES**

#### **2.1 KEY RESULTS AREAS AND STRATEGIC OBJECTIVES**

Basing on the inherent and core functions of CSOs, the broad strategic areas which CSOs seek to engage with the government, other stakeholders and among CSOs themselves are in respect of:-

- (i) Control and prevention of the COVID-19 pandemic.
- (ii) Response and service provisions including monetary, non-monetary and technical support.
- (iii) Impact assessment and mitigation strategies of the negative impacts of the COVID-19 as a result of current or potential measures to be taken.
- (iv) Effective coordination amongst CSOs and between CSOs and the government as well as between CSOs, government and private sector (other stakeholders).

The third area of intervention focuses on issues beyond 'control' and 'prevention' of pandemic such as psychosocial support against social stigma, discrimination, fear, anxiety and other adverse effects involving survivors or victims of COVID-19. The first one includes prevention in the current context; while the second one is basically to reshape the situation as it happens during the interventions. The fourth area is on the inclusion and participation of the CSOs – fitting and mainstreaming CSOs approaches and issues into ongoing national initiatives.

Table 2 below summarizes CSOs' key result areas (KRAs) and strategic objectives (SOs) which this Action Plan seeks to realize as per timelines indicated in the result framework.

**Table 2: CSOs KRAs and Strategic Objectives on COVID-19**

<b>S/ No.</b>	<b>KRAs [= Key Results Areas]</b>	<b>SOs [= Strategic Objectives]</b>
1.	Control and Prevention.	To control, contain and prevent further spread or possibility of new and recurrent cases of the COVID-19 pandemic in Tanzania.
2.	Responsive Service Provisions.	To offer appropriate and effective responsive services in combating the COVID-19 pandemic.
3.	Impacts Assessments and Mitigations.	To conduct an impact assessment and accordingly, support mitigation strategies of the negative impacts of COVID-19.

4.	Coordination and Sustainability.	To enhance and sustain coordination amongst CSOs themselves and between CSOs and the government as well as CSOs, government and other stakeholders.
----	----------------------------------	---

## 2.2 DELIVERABLE RESULTS AND INTERVENTION STRATEGIES

### 2.2.1 Strategic Goal – Impact

The CSOs subscribe to the global and national goal on COVID-19 which is to end the pandemic completely as soon as it is conceivable. Therefore, the CSOs **strategic goal** to be achieved under this Plan is *to contribute to the total control and recurrence of the COVID-19 pandemic and its emergent (aftermath) results.*

### 2.2.2 KRAs and Outcomes

Based on the KRAs and SOs (strategic objectives) mentioned in Table 2, the following are deliverable outcomes or changes, which CSOs seek to realize as drivers towards achievement of the above stated strategic goal.

#### 2.2.2.1 KRA I: COVID-19's Control and Prevention

Under this result area, the expected outcome (change) is to realize a state of affair whereby *'further spread or possibility of new or recurrent cases of the COVID-19 pandemic in Tanzania are effectively controlled, contained and prevented.'* To realize this particular outcome, CSOs plan to engage in a number intervention strategies and actions, the main ones being:-

- (i) To raise awareness of the general public on appropriate measures (announced by the government of Tanzania and WHO) which are intended to decrease risks and protect people (especially the vulnerable groups including those with underlying health conditions). The awareness engagements will be in different forms, including:-
  - a) Use of mainstream media (accessible print, electronic and radio – national and community).
  - b) Use of alternative media (reliable social media platforms).
  - c) Use of accessible IEC materials such as fliers, booklets, placards, etc.
  - d) Use of mobile phone text messages.
- (ii) Hygiene promotion (including advocating for or facilitating presence of basic water and sanitation facilities and change of behavior to reduce risks of contracting or spread of the coronavirus).
- (iii) Contact tracing and detection of possible COVID-19 cases through a web of partners all over the country and through surveillance mechanisms directed by the government of Tanzania. Such cases will then be reported to the relevant government agencies as per operating guidelines.

- (iv) Monitoring and advising on appropriate quarantine measures (e.g which reflect gender and disability sensitivity concerns) as it has been proposed in this paper.
- (v) Contributing to the provision of effective clinical care of individuals who are at high of infection.
- (vi) Research on and share data-driven analysis with the view of improving handling of COVID-19 cases in a more innovative way.
- (vii) Advocating for the reform of policies, rules, guidelines and operating procedures in order to mainstream human rights concerns including specific needs of segregated gender groups.
- (viii) Monitoring adequacy of resources and compliance of health care services including presence of special supportive care to vulnerable groups receiving treatments and other forms of support.
- (ix) Mobilize resources from legal sources in order to intensify the engagements on this outbreak.
- (x) Advocating for sustainable public health and pandemic preparedness awareness and inclusion in the legal, policy and administrative frameworks in Tanzania.
- (xi) Monitoring effective implementation of *COVID-19 Contingency Plan of March – August 2020* and related initiatives by the government and other stakeholders.
- (xii) Advocating for the amendment of the *Disaster Management Act of 2015 (Act No. 7/2015)*; the *Public Health Act of 2009 (Act No. 1/ 2009)*; and other related laws, rules and regulations.

#### 2.2.2.2 KRA II: COVID-19 Responsive Service Provisions

The change deliverable outcome desired under this result area is '*COVID-19 pandemic is effectively combated through appropriate responsive services.*' To realize this particular outcome, CSOs plan to engage in a number of intervention strategies and actions, the main ones being:-

- (i) Soliciting needed resources including sanitizers, face masks, ventilators and sanitary materials from local and international philanthropists and sharing the same with the government.
- (ii) Demonstrate proper hand washing with soap and clean running water as well use of face mask in COVID-19 potential areas. Ensure the hand washing stations are accessible to all people including children and PWDs (installation measures to consider accessibility).
- (iii) Train selected individuals on production of locally made face masks to increase access and availability of the same to needy people in Tanzania.

- (iv) Mobilizing financial resources from various legal sources from within and outside the country and ensuring that such resources are wisely spent for the needy persons affected by COVID-19.
- (v) Offering legal aid services on cases or matters relating to COVID-19 through existing electronic legal aid services provision including PDF managed *Msaadwakisheria App*.
- (vi) Offering psychosocial supports including post COVID-19 exposure cases such as those relating to stigma, discrimination, fear and anxiety.
- (vii) Supporting contact tracing services of potential infections of COVID-19 in collaboration with government machineries.
- (viii) Establish free electronic reporting of potential COVID-19 suspected cases and potential contacts to compliment existing government information on the same.
- (ix) Managing (e.g self-regulating) relevant intra and inter networks of CSOs which address this pandemic in different forms including legal aid services.
- (x) Advocating for sustainable public health and pandemic preparedness awareness and inclusion in the legal, policy and administrative frameworks in Tanzania.
- (xi) Facilitating family reunion of the COVID-19 survivors or victims who were under quarantine or self-isolation.
- (xii) Facilitating service providers to abide by gender and disability sensitive standards in their service provisions especially when handling vulnerable groups (youth, women, people with disabilities etc).
- (xiii) Facilitating availability of disability sensitive services including sign language interpreters (SLIs), accessible quarantine, Braille prints, accessible hand washing facilities and caretakers of persons with severe disabilities.
- (xiv) Ensuring that other marginalized and vulnerable groups such as prisoners, remandees, refugees, asylum seekers, vulnerable migrants and the elderly are offered appropriate care.
- (xv) Facilitating adoption of appropriate learning mechanisms for all students of different levels of education including those with disabilities and the disadvantaged who are currently ordered to stay at home.
- (xvi) Monitoring and supporting availability of sufficient medical services and equipment for COVID-19 infected persons. Such services and equipment to be gender and disability sensitive.

- (xvii) Collaborating with the government in designing standard operating procedures (SOPs) of handling vulnerable groups basing on the nature of their vulnerabilities.
- (xviii) Liaising with public and private financial institutions which could offer economic empowerment support to informal sector actors who would be affected by quarantine or other COVID-19 measures.
- (xix) Advocating for economic reforms to support small and medium enterprises to survive in case of economic meltdown attributed to COVID-19.
- (xx) Advocating for special budgets to MoHCDGEC and PMO in order to finance national disaster committees formed to combat COVID-19.
- (xxi) Advocating for legal and policy reforms in order to have frameworks which are responsive to pandemics in case the same happens in future as suggested under KRA I.

### 2.2.2.3 KRA III: Impacts Assessment and Mitigation of COVID-19's Pandemic

The deliverable outcome or intended change under this result area is to have *'negative impacts of the COVID-19 ascertained and that, the results of the assessment are utilized to device appropriate counter-strategies of same.'* To realize this particular outcome, CSOs plan to engage in a number of intervention strategies and actions, the main ones being:-

- (i) Conducting data driven or evidence based COVID-19 mapping, assessment, studies and researches periodically. The proposed thematic areas include (see Table 3 below):-

**Table 3: Research-Focused Thematic Areas**

Thematic Focus A: Gender / Vulnerable Groups	Thematic Focus B: Issues
<ul style="list-style-type: none"> <li>• Women and girls.</li> <li>• Children.</li> <li>• Youth.</li> <li>• Persons with Disabilities.</li> <li>• Prisoners and other inmates per each category.</li> <li>• Refugees, asylum seekers and vulnerable migrants.</li> <li>• Elderly.</li> <li>• People Living with HIV/ AIDS.</li> <li>• Smokers and those exposed to second hand smoke.</li> </ul>	<ul style="list-style-type: none"> <li>• Education (different levels).</li> <li>• Health.</li> <li>• Informal and formal.</li> <li>• Agriculture, livestock and fishery.</li> <li>• Hunting and gathering.</li> <li>• Extractive industry.</li> <li>• Business and trade.</li> <li>• Hospitality services (transport, hotels, etc).</li> <li>• Economic development generally.</li> <li>• Civil society sector.</li> <li>• Sports and entertainment.</li> <li>• Justice sector.</li> </ul>

- (ii) Analyzing policy and legal frameworks or implications on COVID-19 pandemic.
- (iii) Publishing and disseminating advocacy and awareness materials.
- (iv) Conducting policy and legal dialogues.
- (v) Offering psychosocial support including post COVID-19 exposure cases such as those relating to stigma, discrimination, fear and anxiety.
- (vi) Advise on application and implication of indigenous knowledge including herbs that would be of help.
- (vii) Collaborating with the government and other non-state actors to develop guidelines on assessment and mitigation of COVID-19 and related pandemic.

#### 2.2.2.4 KRA IV: Coordination and Sustainability

Under this result area, the expected outcome (change) is to realize a state of affair whereby *'coordination amongst CSOs (themselves) and between CSOs and the government as well as CSOs, government and other stakeholders is enhanced and sustained.'* This result area is framed against the background that there are existing efforts, albeit weak, among CSOs and between CSOs and government on COVID-19. To realize this particular outcome, CSOs plan to engage in a number of intervention strategies and actions, the main ones being:-

- (i) Ascertaining strategic entry points and areas which CSOs and government can work together.
- (ii) Mainstreaming CSOs' COVID-19 Action Plan within the mainstream national plan (on the same).
- (iii) Working with the government and other non-state actors to improve the coordination mechanisms designated by PMO for managing coronavirus crisis.
- (iv) Institutionalization of CSOs' interventions e.g through policy, legal or administrative reforms.
- (v) Establishing CSOs Disaster Response Forum(s) and institutionalizing the same.
- (vi) Advocating for statutory reforms of the *Disaster Management Act of 2015; the Public Health Act of 2009* and other related laws, rules and regulations in order to reflect mandatory inclusion and participation of CSOs in disaster management committees at different levels.
- (vii) Establishing CSOs coordinating structure as per **Output 4.2** (of the Log Framework Matrix) and **Annex II** (the Structural Layout Itself).

#### 2.2.3 Deliverable Outputs for Each Outcome

Table 4 below summarizes some of the deliverable outputs for each of the four outcomes proposed for implementation under this Action Plan.

##### Information Box: Three Levels of Deliverable Results

This means that, there shall be three layers of the results, namely the impact (goal) mentioned above, the outcomes and outputs. Below outputs, there are activities or actions. Each of these activities have performance indicators (for impact, outcomes and outputs) and targets (for activities). The activities feed into each specific output as indicated in the Result Framework attached herewith.

**Table 4: Deliverable Outputs for Each Outcome of this Action Plan**

Goal/ Impact: *To contribute to the total control and recurrence of the COVID-19 pandemic and its emergent (aftermath) results.*

Outcome No.	Outcomes	Outputs per each Outcome
1.	Further spread or possibility of new or recurrent cases of the COVID-19 pandemic in Tanzania are effectively controlled, contained and prevented.	<p>1.1 Inclusive public awareness on appropriate measures raised.</p> <p>1.2 Hygiene protocols promoted.</p> <p>1.3 Contact tracing and detection of possible COVID-19 cases conducted.</p> <p>1.4 Monitoring of presence of appropriate quarantine measures and other services carried out.</p> <p>1.5 Effective clinical care of individuals who are at high risk of infection offered.</p> <p>1.6 Research and sharing of data-driven analysis on COVID-19 conducted.</p> <p>1.7 Laws, rules, regulations, guidelines and policies on pandemics reformed and reflect gender sensitivity concerns.</p> <p>1.8 Resources from various sources are mobilized.</p> <p>1.9 Implementation of <i>COVID-19 Contingency Plan of March – August 2020</i> and related initiatives by the government and other stakeholders tracked down and shaped.</p>

2.	COVID-19 pandemic is effectively combated through appropriate responsive services in Tanzania.	<p>2.1 Needed resources including sanitizers, face masks, ventilators and sanitary materials from local and international philanthropists are solicited and shared with the government.</p> <p>2.2 Financial resources from various legal sources from within and outside the country are mobilized and monitored.</p> <p>2.3 Legal aid services on cases or matters relating to COVID-19 through existing electronic legal aid services provision including PDF managed <i>Msaadwakisheria App</i> offered to the needy persons.</p> <p>2.4 Psychosocial supports including post COVID-19 exposure cases such as those relating to stigma, discrimination, fear and anxiety provided.</p> <p>2.5 Contact tracing services of potential infections are supported.</p> <p>2.6 Sustainable public health and pandemic preparedness awareness provided.</p> <p>2.7 Family reunion of the COVID-19 survivors or victims who were under quarantine or self-isolation facilitated.</p> <p>2.8 Service providers are facilitated and capacitated to abide by SOPs in their service provisions - especially when handling vulnerable groups including PWDs.</p> <p>2.9 Availability of disability sensitive services including sign language interpreters (SLIs) and caretakers of persons with severe disabilities.</p> <p>2.10 Ensuring that other marginalized and vulnerable groups such as prisoners, remandees, refugees, asylum seekers, vulnerable migrants and the elderly.</p> <p>2.11 Appropriate learning mechanisms for students of different levels of education and needs including those with disabilities and other disadvantaged who are currently ordered to stay at home are facilitated to be adopted.</p> <p>2.12 Availability and accessibility of sufficient medical services and equipment for COVID-19 infected persons is monitored and supported.</p> <p>2.13 SOPs of handling vulnerable groups basing on the nature of their vulnerabilities are designed in collaboration with the government.</p> <p>2.14 Economic empowerment support to informal sector actors who would be affected by quarantine and other COVID-19 measures are offered.</p> <p>2.15 Economic reforms to support small and medium enterprises to survive in case of economic meltdown attributed to COVID-19 are advocated for.</p> <p>2.16 Presence of special budgets for MoHCDGEC and PMO in order to finance national disaster committees formed to combat COVID-19 is advocated for.</p>
----	--	--

		<p>2.17 Legal and policy reforms in order to have frameworks which are responsive to pandemics in case the same happens in future as suggested under KRA I are advocated for.</p> <p>2.18 Selected individuals are trained on production of locally made face masks to increase access and availability of the same to needy people in Tanzania.</p> <p>2.19 Free electronic reporting of potential COVID-19 suspected cases and potential contacts to compliment existing government information on the same.</p> <p>2.20 Sustainable public health and pandemic preparedness awareness is advocated for.</p> <p>2.21 COVID-19 Pre-testing of all citizens at regional level</p>
--	--	---

3.	Negative impacts of the COVID-19 ascertained and that, the results of the assessment are utilized to device appropriate counter-strategies of same.	<p>3.1 Data driven or evidence based COVID-19 mapping, assessments, studies and researches are conducted periodically.</p> <p>3.2 Policy and legal frameworks or implications of COVID-19 pandemic are analyzed.</p> <p>3.3 Advocacy and awareness materials are published in accessible formats and disseminated to the public.</p> <p>3.4 Policy and legal dialogues conducted.</p> <p>3.5 Psychosocial supports including post COVID-19 exposure cases such as those relating to stigma, discrimination, fear and anxiety organized and offered.</p> <p>3.6 Application and implication of indigenous knowledge including herbs that would be of help on COVID-19 identified and advised for use in mainstream ('modern') medical science.</p> <p>3.7 Guidelines on assessment and mitigation of COVID-19 and related pandemics are developed by the government and in collaboration with CSOs and other non-state actors.</p> <p>3.8 CSOs National Recovery Program initiated.</p>
4.	Coordination amongst CSOs themselves and between CSOs and the government as well as CSOs, government and other stakeholders is enhanced and sustained.	<p>4.1 Strategic entry points and areas which CSOs and government can work together are ascertained and utilized.</p> <p>4.2 Components of CSOs' COVID-19 Action Plan are mainstreamed within the mainstream national plan on the same.</p> <p>4.3 CSOs' interventions on COVID-19 are institutionalized e.g through policy, legal or administrative reforms (→ for sustainability purposes).</p> <p>4.4 CSOs Disaster Response Forums are established and institutionalized at the grassroots and national levels.</p> <p>4.5 Statutory reforms of the <i>Disaster Management Act of 2015</i>; the <i>Public Health Act of 2009</i> and other related laws, rules and regulations are advocated for in order to reflect mandatory inclusion and effective participation of CSOs in disaster management committees at different levels.</p> <p>4.6 Government, CSOs and other non-state actors have strengthened partnership and are working together to improve the coordination mechanisms designated by the PMO for managing coronavirus crisis.</p> <p>4.7 Relevant intra and inter CSOs' thematic and non-thematic networks on COVID-19 and related pandemics are effectively coordinating and regulating themselves under codified <i>modus operandi</i>.</p>

## 2.3 TANZANIA CSOS' THEORY OF CHANGE ON COVID-19

The CSOs' approaches to COVID-19 interventions take into consideration the importance of control, prevention and coordination measures in which response and coordination are central part of the measures. The three intervention strategies are interwoven and logically arranged to feed into each other for a common goal and impact. However, each of these intervention strategies could stand alone in realizing the ultimate goal. The outputs or actions for each result area (translated into outcomes) do also feed into each other – some are relevant to more than one outcome. This means that implementing partners will have to glue together some of the activities to realize different results. This is designed in this way in order to achieve optimal results through minimum resources (efficiency). Figure 1 below summarized a full and logic flow of theory of change:

**Figure 1: Tanzanian CSOs' Theory of Change of COVID-19 Multi-Interventions**

**Source:** Tanzania CSOs' Directors Forum Position Paper and Action Plan of April 2020

The practicability of this theory of change is through a result framework enclosed herewith. The said framework (logical framework) indicate logically the flow of results and actions from impact level to outcomes (changes), outputs (immediate results) and activities (actions).

## 2.4 IMPLEMENTATION, MONITORING AND EVALUATION

The CSOs will devise comprehensive monitoring and evaluation (M&E) plans to be deduced from the logical framework matrix attached herewith. The designing of the M&E plan will consider the following coordination approaches: -

- (i) CSOs to divide responsibilities based on thematic areas indicated above (Table 3) and in the Position Paper (Parts II and III).
- (ii) Joint fundraising initiatives to finance the activities in this plan.
- (iii) Common advocacy strategies.
- (iv) Adherence to the principles contained in this plan.
- (v) Make use of the existing networking structures especially under the THRDC.
- (vi) Mutual contributions (financial, technical, (resources), manpower) on voluntary basis.
- (vii) Periodic reporting after monitoring.
- (viii) Standard reporting.
- (ix) Having mid and annual evaluations of the effectiveness, efficiency, relevancy and sustainability of the results and intervention strategies on COVID-19.

**ANNEX II: COORDINATION STRUCTURE**

**ANNEX III: BUDGET ESTIMATES**

## ANNEX I: RESULTS MATRIX – LOGICAL FRAMEWORK

**Table 3: Logic Framework – Tanzanian CSOs COVID 19 Action Plan**

RESULT AREAS AND ACTIONS	PERFORMANCE INDICATORS	MEANS OF VERIFICATION	Responsible CSO(s) /
<b>Overall Goal (for IMPACT)</b>	<b>Impact Indicators</b>		<b>Tasked Thematic Group(s)</b>
To contribute into the total control and recurrence of the COVID-19 pandemic and its emergent (aftermath) results.	<ul style="list-style-type: none"> <li>Baseline data/ information (to be established).</li> <li>WHO's Indicators of COVID-19.</li> <li>Government of Tanzania's Indicators of COVID-19.</li> <li>UNDP's Rapid Assessment Report on COVID-19.</li> </ul>	<ul style="list-style-type: none"> <li>Government report on trend COVID-19.</li> <li>WHO report on trend of COVID-19.</li> <li>Other official reports on the trends of COVID-19.</li> </ul>	<ul style="list-style-type: none"> <li>All CSOs thematic groups under CDF</li> </ul>
<b>OUTCOME I</b>	<b>Outcome Indicators</b>		
Further spread or possibility of new or recurrent cases of the COVID-19 pandemic in Tanzania are effectively controlled, contained and prevented.	<ul style="list-style-type: none"> <li>Number reported cases (reduction trend).</li> <li>Availability of vaccine.</li> <li>Number of people vaccinated for pandemic prevention.</li> <li>Number of people tested</li> </ul>	<ul style="list-style-type: none"> <li>MoHCDGEC and WHO Reports/ Data.</li> <li>Medical Reports</li> </ul>	<ul style="list-style-type: none"> <li>All CSOs thematic groups under CDF</li> </ul>
<b>Output 1.1</b>	<b>Output Indicators (1.1)</b>		
Public awareness on appropriate measures raised.	<ul style="list-style-type: none"> <li>Number of people reached per geographical locations (regions, districts, wards, streets, villages and hamlets); and, gender (sex, age, disability status, inmates, refugees, etc).</li> <li>At least 80% of the population are adequately aware of COVID-19 response and preventive measures.</li> <li>At least 80% are adopting various measures to respond and prevent COVID-19.</li> <li>Number of CSOs, Media with awareness programs</li> </ul>	<ul style="list-style-type: none"> <li>Case studies documented.</li> <li>Newspaper cuttings.</li> <li>Other media reports.</li> <li>Activity reports.</li> </ul>	<ul style="list-style-type: none"> <li>Community Radios</li> <li>Online Media</li> <li>All CSO's thematic groups</li> </ul>
<b>Activities for Output 1.1</b>	<b>Targets/ Milestones for Activities of Output 1.1</b>		

1.1.1	Popularizing the WHO's/UN and government of Tanzania's sensitization and publicity (EIC) materials into Kiswahili and disability accessible languages/ formats.	<ul style="list-style-type: none"> <li>• Different of sensitization and publicity materials identified by 30<sup>th</sup> May 2020 [Topics to include tobacco control, among others].</li> <li>• Number of sensitization and publicity materials popularized by June 2020 (in different formats accessible to all gender groups including children and PWDs).</li> </ul>	Copies of the materials and messages.	<ul style="list-style-type: none"> <li>• DIGNITY Kwanza.</li> <li>• TTCF.</li> <li>• TIBA.</li> <li>• All CSOs thematic groups under CDF</li> </ul>
1.1.2	Organizing special awareness raising programs on social and mainstream media outlets on COVID-19 prevention and control measures.	<ul style="list-style-type: none"> <li>• 5,000 radio and TV spots aired Monthly</li> <li>• 100,000 social media messages programmed monthly.</li> <li>• 100 messages from MoHCDEC/ government aired through different media outlets.</li> <li>• At least 50,000,000 group text messages (SMS) issued through mobile phone networks annually.</li> <li>• Number of smokers sensitized to quit smoking in order to reduce risks of contracting severe COVID-19.</li> </ul>	Reports from media houses. Mapping reports of the social media monitored.	<ul style="list-style-type: none"> <li>• DIGNITY Kwanza.</li> <li>• TCF</li> <li>• All CSOs thematic groups under CDF</li> </ul>
1.1.3	Prepared and disseminating sensitization and awareness materials on COVID-19 to the public.	<ul style="list-style-type: none"> <li>• 100,000 posters printed and disseminated to the public annually.</li> <li>• 5,000 special posters on tobacco use and control printed and disseminated to the public Monthly</li> <li>• 100,000 social media messages programmed Monthly.</li> <li>• At least 50,000,000 group text messages (SMS) issued through mobile phone networks Monthly</li> <li>• 100 e-learning postcards disseminated through different digital platform.</li> </ul>	Monthly monitoring reports.	All CSOs thematic groups under CDF
1.1.4	Updating legal aid networks, other thematic networks and non-thematic networks on the COVID-19's control/ prevention measures through phones, emails, <i>Whatsapp</i> groups, websites, and other forms of digital methods.	<ul style="list-style-type: none"> <li>• Number of laptops/ smartphones procured for this intervention.</li> <li>• Number of updates shared out weekly through websites.</li> <li>• Number of updates shared out weekly through <i>Whatsapp</i> groups.</li> <li>• Number of updates shared out weekly through mobile phones.</li> <li>• Number of women and other gender groups or individuals received the updates.</li> </ul>		All CSOs thematic groups under CDF
<b>Output 1.2</b>		<b>Output Indicators (1.2)</b>		
	Hygiene requirements and protocols promoted.	<ul style="list-style-type: none"> <li>• Number of the members of the public (segregated per gender groups) who practice or adhere to hygiene requirements and protocol.</li> <li>• Trend of availability of hygiene facilities and protective gears for public use both in urban and rural settings.</li> </ul>	<ul style="list-style-type: none"> <li>• Social media coverage stories.</li> <li>• News papers reporting.</li> </ul>	<ul style="list-style-type: none"> <li>• All CSOs thematic groups under CDF</li> </ul>

	<ul style="list-style-type: none"> <li>Level or status of enforcement of the LGAs' related by-laws relating to public health.</li> <li>Presence of some extra-judicial practices (including community plans) which encourage hygiene conforming with government directives.</li> <li>Availability of hygiene materials in women and other groups working in markets and other places.</li> <li></li> </ul>	<ul style="list-style-type: none"> <li>Activity reports.</li> </ul>	
<b>Activities for Output 1.2</b>	<b>Targets/ Milestones for Activities of Output 1.2</b>		
<b>1.2.1</b> Facilitating installation/ presence of free of charge hand-washing points at public places including markets and bus stops.	<ul style="list-style-type: none"> <li>50,000 hand-wash points at main bus stops by June 2020.</li> <li>50,000 hand-wash points at major market places by June 2020.</li> <li>50,000 hand-wash points at other crowded public places by July 2020.</li> </ul>	Monitoring reports	All CSOs thematic groups under CDF
<b>1.2.2</b> Advocating for presence of basic sanitation facilities such as sanitizers, affordable protective gears (mask face, gloves, etc) in areas where there is scarcity of running water.	<ul style="list-style-type: none"> <li>1,000,000 bottles of sanitizers in areas with scarcity of water supply by July 2020.</li> <li>At least 3,000,000 traders have access to affordable/ free face masks and other protective gears as per issued protocols.</li> <li>Dissemination of washable 100,0000 masks to marginalized communities</li> </ul>		<ul style="list-style-type: none"> <li>EfG</li> <li>All CSOs thematic groups under CDF</li> </ul>
<b>1.2.3</b> Sensitizing general public on behavior changes to reduce risks of spread of COVID-19 and related infections.	<ul style="list-style-type: none"> <li>At least 10,000,000 public members reached through media Monthly</li> <li>At least 1,000,000 public members reached through IEC materials</li> <li>At least 100,000 public members reached through other ways including community mobilizers/ educators</li> </ul>		<ul style="list-style-type: none"> <li>DIGNITY Kwanza</li> <li></li> <li>All CSOs thematic groups under CDF</li> </ul>
<b>1.2.4</b> Facilitating installation/ presence of free of charge hand-washing points at public places including petty food and beverage vendors' spots.	<ul style="list-style-type: none"> <li>500,000 hand-wash points made available by May 2020.</li> <li>Number water supply pots which use little waters invented and supplied.</li> </ul>		TIBA All CSOs thematic groups under CDF
<b>1.2.5</b> Training of community Gender Champions on COVID-19's health tips.	<ul style="list-style-type: none"> <li>200 Community Gender Champions are trained of COVID-19.</li> </ul>		TIBA.
<b>1.2.6</b> Providing COVID-19 Testing Facilities to Government for Fives Zones (	<ul style="list-style-type: none"> <li>10000 people are tested weekly at each zone</li> </ul>		All CSOs thematic groups under CDF

North, Central , South , Lake Zone and Zanzibar )			
<b>Output 1.3</b>	<b>Output Indicators (1.3)</b>		
Contact tracing and detection of possible COVID-19 cases conducted.	<ul style="list-style-type: none"> <li>• Number of contacts effectively traced and quarantined.</li> <li>• Number of people who are aware of the importance of being transparency of the public about the importance of sharing information in relation to contact tracing.</li> <li>• Trend of an improvement of the detection and quarantine capacity as per required standards.</li> <li>• Number of COVID-19 Testing machines available at zonal level</li> </ul>	•	<ul style="list-style-type: none"> <li>• SIKIKA</li> <li>• TIBA</li> <li>• Others</li> </ul>
<b>Activities for Output 1.3</b>	<b>Targets/ Milestones for Activities of Output 1.3</b>		
<b>1.3.1</b> Liaising with the government on potential cases to trace.	<ul style="list-style-type: none"> <li>• At least 4 meetings between CSOs COVID-19 forum and government machineries of different levels per month.</li> <li>• Number of cases traced and identified per week.</li> <li>• Number of cases reported per week.</li> </ul>		All CSOs thematic groups under CDF
<b>1.3.2</b> Creating referral mechanisms on contact tracing at national and local levels.	<ul style="list-style-type: none"> <li>• 185 district referral mechanisms on COVID-19 in Tanzania Mainland.</li> <li>• 25 regional referral networks on COVID-19 in Tanzania Mainland.</li> <li>• 1 national referral mechanism connecting from similar mechanisms at regional levels.</li> </ul>		<ul style="list-style-type: none"> <li>• All CSOs thematic groups under CDF</li> <li>• SIKIKA</li> </ul>
<b>1.3.3</b> Tracing potential cases and report the same to the government per devised protocols.	<ul style="list-style-type: none"> <li>• Number of cases traced and identified per week.</li> <li>• Number of cases reported per week.</li> </ul>		DIGNITY Kwanza SIKIKA
<b>Output 1.4</b>	<b>Output Indicators (1.4)</b>		
Monitoring of presence of appropriate quarantine measures and other services carried out.	<ul style="list-style-type: none"> <li>• Types and nature of data which are accurately and timely captured and documented.</li> <li>• Types and nature of data which are accurately and timely analyzed and published per government's guidelines.</li> <li>• Types and nature of data which are accurately and timely utilized to inform of the decisions and actions.</li> </ul>	<ul style="list-style-type: none"> <li>• Reports of data captured.</li> <li>• Activity Reports.</li> </ul>	<ul style="list-style-type: none"> <li>• All CSOs thematic groups under CDF</li> </ul>
<b>Activities for Output 1.4</b>	<b>Targets/ Milestones for Activities of Output 1.4</b>		
<b>1.4.1</b> Developing SOPs on standard quarantine (and other) measures.	<ul style="list-style-type: none"> <li>• 3,000 copies of SOPs printed in English language.</li> <li>• 7,000 copies of SOPs printed in Kiswahili language.</li> </ul>		All CSOs thematic groups under CDF
<b>1.4.2</b> Developing monitoring tools with set of check-lists.	<ul style="list-style-type: none"> <li>• 7,000 monitoring tools printed in English language.</li> <li>• 13,000 monitoring tools printed in Kiswahili language.</li> </ul>		All CSOs thematic groups under CDF

1.4.3	Applying for an approval of the SOPs/ monitoring tools to the government.	<ul style="list-style-type: none"> <li>Approval granted by 30<sup>th</sup> June 2020.</li> </ul>		All CSOs thematic groups under CDF
1.4.4	Conducting periodical monitoring of the quarantine measures and other services.	<ul style="list-style-type: none"> <li>Number of monitoring conducted on weekly basis.</li> </ul>		All CSOs thematic groups under CDF
1.4.5	Preparing the monitoring reports and discuss the same with the government for improvements, public members and other stakeholders.	<ul style="list-style-type: none"> <li>Number of monitoring reports prepared monthly.</li> </ul>		
<b>Output 1.5</b>		<b>Output Indicators (1.5)</b>		
	Effective clinical care of individuals who are at the highest risk infection offered.	<ul style="list-style-type: none"> <li>Trend of offering clinical care.</li> <li>Number of beneficiaries of the clinical care.</li> </ul>	<ul style="list-style-type: none"> <li></li> </ul>	<ul style="list-style-type: none"> <li>KVP Groups</li> <li>PLWHIV Groups</li> <li>Help-Age International</li> </ul>
<b>Activities for Output 1.5</b>		<b>Targets/ Milestones for Activities of Output 1.5</b>		
1.5.1	Identifying and documenting individuals who are vulnerable to infections.	<ul style="list-style-type: none"> <li>Number of individuals identified on weekly basis.</li> </ul>		<ul style="list-style-type: none"> <li>DIGNITY Kwanza.</li> <li>SIKIKI.</li> <li>Positive Women Living With HIV</li> </ul>
1.5.2	Offering special clinical care of smokers who are at the highest risk infection.	<ul style="list-style-type: none"> <li>4 sampled clinical and cessions services advised per month.</li> <li>4 sampled clinical and related services (cession services) supported in various ways per month.</li> <li>4 sampled clinical and related services (cessions services) monitored per month.</li> </ul>		<ul style="list-style-type: none"> <li>TTCF.</li> </ul>
1.5.3	Sharing the reports with the government.	<ul style="list-style-type: none"> <li>1 joint CSOs report shared monthly.</li> </ul>		THRDC/ACTION AID
1.5.4	Advising, supporting and monitoring availability of appropriate clinical and related care services to the vulnerable groups identified including people living with HIV.	<ul style="list-style-type: none"> <li>4 sampled clinical and related services advised per month.</li> <li>4 sampled clinical and related services supported in various ways per month.</li> <li>4 sampled clinical and related services monitored per month.</li> </ul>		<ul style="list-style-type: none"> <li>Thematic Groups of CSOs under CDF</li> <li>Positive Women</li> </ul>
1.5.5	Offering Clinical care and early testing of COVID-19 to PLHIV and KVP	<ul style="list-style-type: none"> <li>4 sampled clinical and cessions services advised per month.</li> <li>4 sampled clinical and related services (cession services) supported in various ways per month.</li> </ul>		<ul style="list-style-type: none"> <li>Positive Women Living with HIV</li> <li>KVP</li> </ul>

	<ul style="list-style-type: none"> <li>4 sampled clinical and related services (cessions services) monitored per month.</li> <li>Number of PLHV tested.</li> </ul>		
<b>Output 1.6</b>	<b>Output Indicators (1.6)</b>		
Researches on and sharing of data-driven analysis on COVID-19 conducted.	<ul style="list-style-type: none"> <li>Number of researches conducted.</li> <li>Type, nature and usefulness of data shared.</li> </ul>	<ul style="list-style-type: none"> <li></li> </ul>	<ul style="list-style-type: none"> <li>Thematic Groups of CSOs under CDF.</li> </ul>
<b>Activities for Output 1.6</b>	<b>Targets/ Milestones for Activities of Output 1.6</b>		
<b>1.6.1</b> Liaising with the government research institutions such as NIMR, COSTECH and Universities to identify research gaps.	<ul style="list-style-type: none"> <li>3 meetings with 30 government representatives and 45 CSOs' representatives conducted annually.</li> <li>At least 10 representatives of CSOs thematic groups met quarterly to discuss on the research gaps by July 2020.</li> <li>1 research gap identified quarterly.</li> </ul>		<ul style="list-style-type: none"> <li>DIGNITY Kwanza.</li> <li>SIKIKI.</li> <li>Others.</li> </ul>
<b>1.6.2</b> Recruiting qualified researchers.	<ul style="list-style-type: none"> <li>1 principal researcher recruited by July 2020.</li> <li>2 assistant researchers recruited by July 2020.</li> </ul>		
<b>1.6.3</b> Conducting demand-driven researches.	<ul style="list-style-type: none"> <li>1 research conducted quarterly for 21 days per timeline above.</li> </ul>		
<b>1.6.4</b> Publishing and disseminating/ sharing out the research findings.	<ul style="list-style-type: none"> <li>2,000 copies of research reports published in English per timeline above.</li> <li>4,000 copies of research reports published in Kiswahili per timeline above.</li> <li>6,000 copies of research reports disseminated countrywide per timeline above.</li> </ul>		<ul style="list-style-type: none"> <li>Thematic Groups of CSOs under CDF</li> </ul>
<b>1.6.5</b> Following up implementation of the recommendations from the researches.	<ul style="list-style-type: none"> <li>1 follow-up intervention done monthly.</li> </ul>		
<b>Output 1.7</b>	<b>Output Indicators (1.7)</b>		
Laws, rules, regulations, guidelines and policies on pandemics reformed and reflect gender sensitivity concerns.	<ul style="list-style-type: none"> <li>Presence of the relevant laws or rules or regulations amended or enacted.</li> <li>Presence of the relevant policies or guidelines reformed or formulated.</li> <li>(As a special consideration in this regard) presence of the Tobacco control bill tabled and passed in parliament to protect no-smokers from tobacco smoke and assist smokers to quit.</li> </ul>	<ul style="list-style-type: none"> <li>Copies of laws or rules or regulations amended or enacted.</li> <li>Copies of policies or guidelines</li> </ul>	<ul style="list-style-type: none"> <li>Thematic Groups of CSOs under CDF</li> <li>THRDC</li> </ul>

		reformed or formulated.	
<b>Activities for Output 1.7</b>	<b>Targets/ Milestones for Activities of Output 1.7</b>		
1.7.1 Identifying legal and policy gaps needing reforms.	<ul style="list-style-type: none"> <li>At least 10 representatives of CSOs thematic groups met quarterly to discuss on the legal and policy gaps.</li> <li>Number of legal and policy gaps identified.</li> </ul>		<ul style="list-style-type: none"> <li>DIGNITY Kwanza</li> <li>Others</li> </ul>
1.7.2 Recruiting qualified legal and policy analysts.	<ul style="list-style-type: none"> <li>1 principal analyst recruited by 30<sup>th</sup> June 2020.</li> <li>2 assistant analyst recruited by 30<sup>th</sup> June 2020.</li> </ul>		
1.7.3 Conducting in-depth legal and policy analysis on COVID-19.	<ul style="list-style-type: none"> <li>1<sup>st</sup> legal and policy analysis conducted for 25 days from 1<sup>st</sup> July 2020.</li> <li>2<sup>nd</sup> legal and policy analysis conducted for 25 days by 30<sup>th</sup> December 2020.</li> </ul>		<ul style="list-style-type: none"> <li>Thematic Groups of CSOs under CDF</li> </ul>
1.7.4 Publishing and disseminating/ sharing out the findings of the analysis.	<ul style="list-style-type: none"> <li>1,000 copies of analysis reports published in English per timeline above.</li> <li>2,000 copies of analysis reports published in Kiswahili per timeline above.</li> <li>2 forums organized to share findings with relevant authority for action.</li> <li>3,000 copies of analysis reports simplified and disseminated countrywide per timeline above.</li> </ul>		<ul style="list-style-type: none"> <li>HAKIELIMU</li> <li>Thematic Groups of CSOs under CDF</li> <li></li> </ul>
